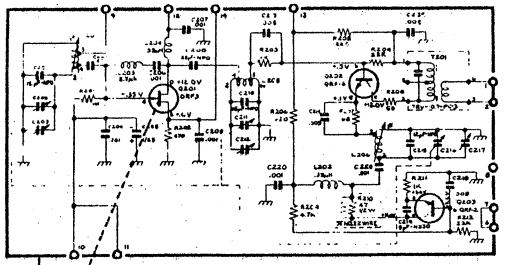
SCOTT 342C 100W RECEIVER

Schaltbild

(in Baugruppen aufgeteilt)

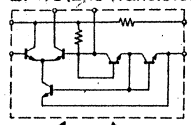
Herausgeber: SYMA Electronic GmbH · 4 Düsseldorf · Grafenberger Allee 39 · Tel. (0211) 682788/89



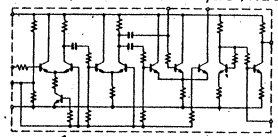
Versilberte Eingangsstufe mit FET

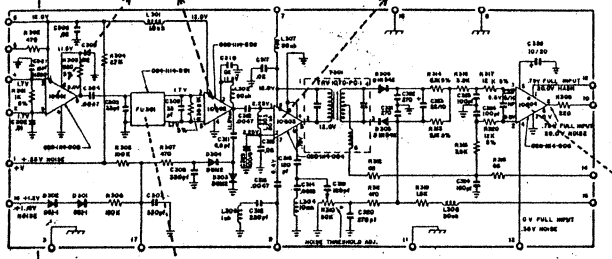
FET

ZF-IC (2x5 Transistoren)

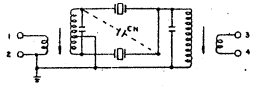


ZF-IC (10 Transistoren, 20 Widerst.)



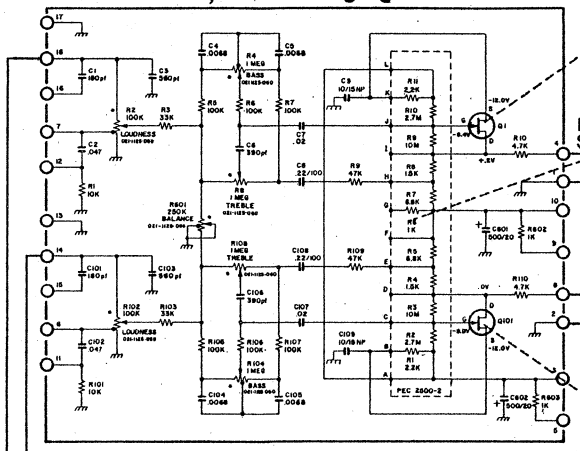


Quarzfilter/IC-ZF-Stufe



Scott Kristallgitter-Quarzfilter 10,7 MHz

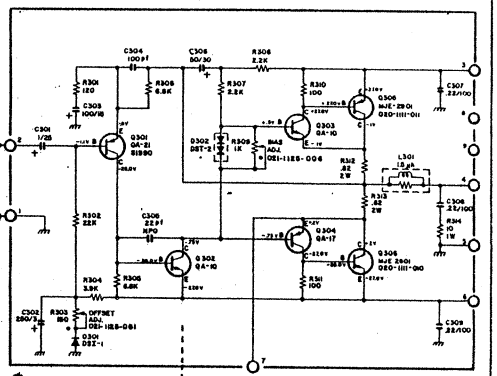
FET-bestückte, aktive Klangregelstufe



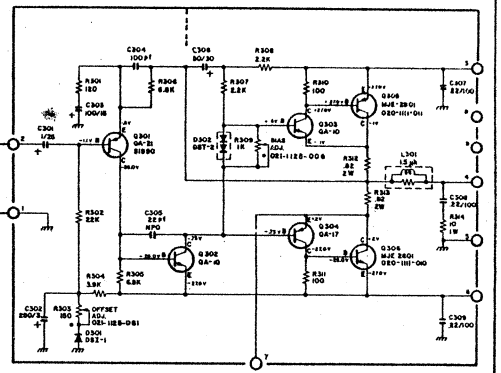
Dickfilm-Schaltkreis

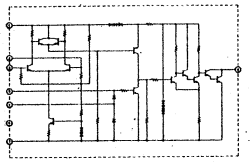
FET

FET



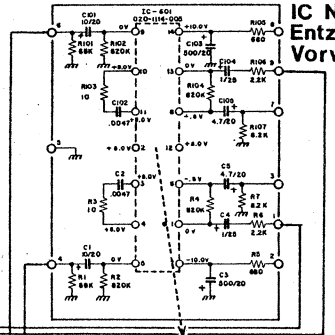
Galvanisch gekoppelte Total-Komplementär-Endstufen T/K/E



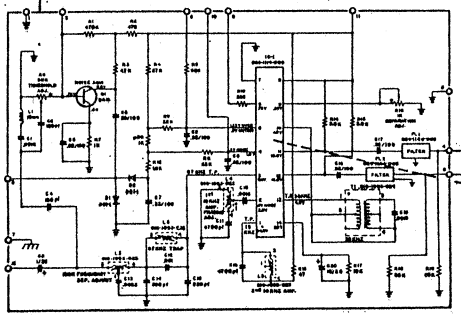


Perfectune und Muting IC

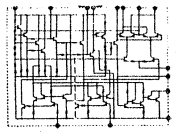
12 Transistoren
10 Dioden
29 Widerstände



IC NF-Entzerrer-Vorverstärker

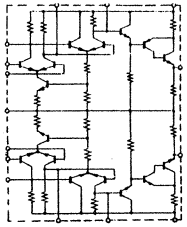


IC Multiplex-Decoder



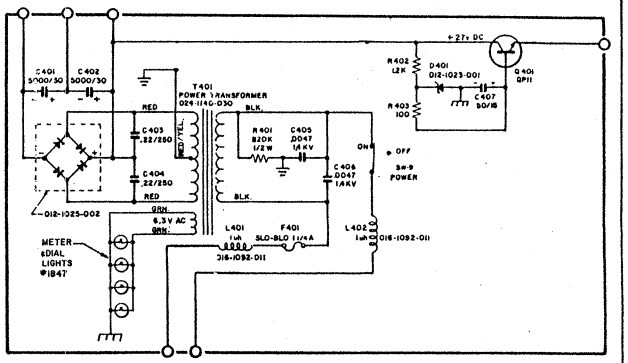
Multiplex-Decoder IC

31 Transistoren
10 Dioden
29 Widerstände



NF-Vorverstärker IC

16 Transistoren
18 Widerstände



Symetrisches Netzteil, elektronisch stabilisiert
